IV. Questions and Answers

V. Closing Remarks and Adjourn

Presentations will be made available at www.bsce.org on Thursday, January 27. Please direct follow-up questions to Ruth McCormick at rmccormick@bcse.org.

The Business Council for Sustainable Energy (BCSE) is an organization dedicated to implementing market-based approaches to reducing pollution and providing a diverse, secure mix of energy resources. Founded in 1992 by senior executives in the natural gas, energy efficiency, electric utility, and renewable energy industries, the Council offers a distinct, business-oriented perspective on energy, environmental and sustainability issues. BCSE's members have combined annual revenues of over \$650 billion, providing America with clean energy services, technology products, and power generation.

Business Council for Sustainable Energy • 1620 I Street NW, Suite 501 • Washington, DC 20006

Participant Bios

Chris Cook, Government Affairs, SunEdison

SunEdison develops, finances, operates and monitors solar plants across the globe. Thanks to its unique Solar Power Purchase Agreement (PPA), SunEdison helps organizations take advantage of everything solar energy services have to offer—including proven financial savings. SunEdison is North America's largest energy services provider, currently managing more than 102.6 MW of photovoltaic solar power plants on the continent. Mr. Cook assists the company in its policy development and engagement.

Dave Muchow, President and CEO, SkyBuilt Power

SkyBuilt Power is the leader in rapidly deployable renewable energy solutions for the military and commercial markets. Mr. Muchow is an attorney, an officer with various energy companies, and an inventor. He has over 30 years of experience in energy matters in the government (Hill, NSC, OMB, DOJ), commercial, and financial sectors.

Anna Pavlova, Director, Government Affairs, Johnson Controls

Johnson Controls is a global diversified technology and industrial leader serving customers in over 150 countries. Its over 130,000 employees create quality products, services and solutions to optimize energy and operational efficiencies of buildings; lead-acid automotive batteries and advanced batteries for hybrid and electric vehicles; and interior systems for automobiles. Ms. Pavlova directs the company's government engagement for all three business units.

Chris Perrault, Vice President of Government Relations, Direct Energy

Direct Energy is a provider of a full suite of electric and natural gas solutions to residential and business customers – from energy supply to energy services. The company is the largest competitive retailer of energy and related services in North America, with over 6 million customer relationships and 6,000 employees. Mr. Perrault oversees Direct Energy's federal presence in Washington. He previously managed Direct Energy's climate change strategy, overseeing the company's response to climate change and related concerns, including investments in clean technology.
