

**BCSE Statement on the Introduction of the Clean Energy Technology
Manufacturing and Export Assistance Act
January 26, 2011**

“The Clean Energy Technology Manufacturing and Export Assistance Act will help US firms export their goods and services abroad,” said Lisa Jacobson, President of the Business Council for Sustainable Energy.

“The introduction of this bill shows Congress's recognition of the important role that clean energy sectors play in putting Americans back to work and strengthening our manufacturing sector. The Business Council for Sustainable Energy encourages Congress to act upon this important piece of legislation and to also press forward with additional legislation that will expand domestic markets for clean energy and energy efficiency goods and services in order to strengthen the economy and create jobs.”

About the BCSE

The Business Council for Sustainable Energy (BCSE) is an organization dedicated to providing a diverse, secure mix of energy resources. Founded in 1992 by senior executives in the natural gas, energy efficiency, electric utility, and renewable energy industries, the Council offers a distinct, business-oriented perspective on energy, economic and sustainability issues. The Council provides America with clean energy services, technology products, and power generation in all fifty states. For more information, please visit <http://www.bcse.org>.
