

Bruno Meyer is a consultant in energy and telecommunication. Previously, he was a senior advisor at RTE, the French electric Transmission System Operator. From 2011 until 2016, he was the CEO of ARTERIA, the telecommunications subsidiary of RTE. From 1985 to 2010 he was at EDF, one of the world's major utilities in 1985. There, he held several positions including VP for EDF's R&D on Transmission & Distribution, and director of departments covering the fields of power systems and power grid technology. He has published more than 50 scientific and conference papers including a book on power system simulation. He is an IEEE Fellow (2008). Meyer was a member of IEEE Board of Directors (2018-2019), IEEE Technical activities Board (2018-2019) and IEEE Power & Energy Society Governing Board (2005-2008 and 2017-2019). He holds a Ph.D. from Edinburgh University, an M.Sc.

University of Sao Paulo (USP) and B.Sc. from Universidade de Campinas (Unicamp).
