

**Nicole Steele**  
**Senior Advisor for Equity and Workforce**  
**U.S. Department of Energy Solar Energy Technologies**  
**Office**

Nicole Steele joined the U.S. Department of Energy Solar Energy Technologies Office in January 2021 as a senior advisor for equity and workforce issues and leads the National Community Solar Partnership. She is a nationally recognized leader and expert in clean energy with a focus on frontline communities and workforce development. She has 20 years of experience working with government officials, policymakers, advocates, and entrepreneurs to develop and implement inclusive clean energy policies and programs. Nicole was the founding executive director of GRID Alternatives Mid-Atlantic, policy director at the Alliance to Save Energy, and ran the Energy Efficiency and Conservation Block Grant (EECBG) program for Loudoun County, Virginia. She started her career in affordable housing, community planning, and politics. She is an AmeriCorps alumni and passionate supporter of community service.
