**BCSE Comments on FERC Advanced Notice of Proposed Rulemaking on Transmission Issues**

Washington, D.C. – Today, the Business Council for Sustainable Energy (BCSE) [submitted comments](#) to the Federal Energy Regulatory Commission on their Advance Notice of Proposed Rulemaking: Building for the Future Through Electric Regional Transmission Planning and Cost Allocation and Generator Interconnection.

“BCSE supports FERC taking action to address electric transmission planning, cost allocation and generator interconnection processes, and encourages FERC to approach this review process in a holistic manner,” said BCSE President Lisa Jacobson. “In light of the ongoing transformation of the energy industry, successful transmission planning processes will support system reliability and resilience, grid modernization and emissions reductions and other environmental objectives, and maintain the benefits of competitive markets.”

###

The Business Council for Sustainable Energy (BCSE) is a coalition of companies and trade associations from the energy efficiency, natural gas and renewable energy sectors, and also includes investor-owned utilities, public power, independent power producers, project developers, equipment manufacturers, and environmental and energy market service providers. Established in 1992, the Council advocates for policies that expand the use of commercially-available clean energy technologies, products and services.
