

Capital Power

Headquartered in Alberta, Canada, Capital Power is a power generation company with facilities ranging from zero-emission waste heat to wind and solar. Together, their thermal and renewable assets represent approximately 7,500 MW of generation capacity that is well-positioned to support the low-carbon energy system.

Avik Dey

President and Chief Executive Officer

As the President and CEO of Capital Power, Avik leads the company in its growth and expansion across Canada and the U.S. and champions the team in accelerating its current strategic drive to net zero.

Prior to joining Capital Power, Avik spent over two decades in the energy business in executive, operational, investing, and senior advisory roles. He has invested over \$12 billion in growing long-term value for energy and energy transition companies.

Avik strongly believes in fostering the next generation of entrepreneurs and currently serves as the Director of Enactus Canada, an international non-profit helping university students solve the world's biggest problems through social innovation.
