The Honorable Glenn Thompson  
Chairman  
House Committee on Agriculture  
400 Cannon House Office Building  
Washington, DC 20510

The Honorable David Scott  
Ranking Member  
House Committee on Agriculture  
468 Cannon House Office Building  
Washington, DC 20510

Chairman Thompson and Ranking Member Scott:

On behalf of the Business Council for Sustainable Energy (BCSE) and the Clean Energy Business Network (CEBN), we are writing to urge Congress to include important clean energy and energy efficiency provisions in the Farm Bill during the 2023-2024 reauthorization process to support economic development, clean energy and energy efficiency jobs, and resilience in rural communities.

Rural clean energy programs in the Farm Bill have provided the means for agriculture-based entrepreneurs to benefit their communities in many sectors – from wind, geothermal, hydropower, and solar power; to biogas and advanced biofuels; to biopower, bio-based products, renewable chemicals, and energy efficiency.

BCSE and CEBN recommend Congress include Farm Bill provisions to build upon these successes, including:

- Establish new tax credits and bonds for rural communities to boost investment in infrastructure and other public projects by providing affordable access to the large taxable bond market. Please see the bipartisan [American Infrastructure Bonds Act](#).
- Include the [Biomass and Biogas for Electric Vehicles Act](#), which would implement the eligibility for electricity generated from renewable biomass, including biogas, under the renewable fuel standard (RFS) program provided by Congress in 2007.
- Reauthorize and revise the Renewable Energy for America Program (REAP) and the Rural Energy Savings Program (RESP) to bring the benefits of clean energy and energy efficiency to more farmers, ranchers, and small businesses in rural communities.
- Enhance Farm Bill rural development programs to support practices that improve waste management, water quality, nutrient recycling, soil health, and clean energy in rural communities.
- Refine and grow programs from the 2018 Farm Bill to support rural green jobs and resilience.
- Support research and programs to improve sustainability on American farms.

For more information on the recommendations of BCSE and CEBN members, please [click here](#). As a diverse coalition, not all members endorse or take a position on the set of recommended provisions.

The BCSE-BNEF [2023 Sustainable Energy in America Factbook](#)<sup>1</sup> provides valuable year-over-year data and insights on the energy transition happening across the United States, including in the country's rural communities.

BCSE members and CEBN would welcome the opportunity to meet with your staff to further discuss provisions under consideration in the Farm Bill reauthorization. For further information or to schedule a time to meet with BCSE members, please contact Ruth McCormick at [rmccormick@bcse.org](mailto:rmccormick@bcse.org).

Sincerely,

Lisa Jacobson  
President  
Business Council for Sustainable Energy

Lynn Abramson  
President  
Clean Energy Business Network

*About BCSE and CEBN*

BCSE is a coalition of companies and trade associations from the energy efficiency, energy storage, natural gas, renewable energy, sustainable transportation, and emerging decarbonization technology sectors. It includes independent electric power producers, investor-owned utilities, public utilities, equipment manufacturers, commercial end users, and service providers in energy and environmental markets. Founded in 1992, the coalition's diverse business membership is united around the revitalization of the U.S. economy and the creation of a clean, secure, and reliable energy future in America.

CEBN is an independent small- and medium-size business initiative under the BCSE banner. Together, BCSE and CEBN represent a broad range of the clean energy economy, from Fortune 100 companies to small businesses working in all 50 states and over 400 congressional districts. On a national basis, these industries support over 3 million U.S. jobs.

CC: Members of the House Committee on Agriculture
