BCSE Statement in Response to Hydrogen Hub Awardees

Washington, D.C. – Lisa Jacobson, President of the Business Council for Sustainable Energy (BCSE), offered the following statement in response to the U.S. Department of Energy’s announcement of the [Regional Clean Hydrogen Hubs \(H2Hubs\) Program](#) awardees:

“As one of the many impactful clean energy policies funded by the bipartisan Infrastructure Investment and Jobs Act of 2021, the Regional Clean Hydrogen Hubs Program is an important milestone in building up the U.S. clean hydrogen industry and lowering emissions from hard-to-decarbonize sectors. Clean hydrogen is a critical tool in the broad portfolio of energy solutions our country needs to reduce carbon pollution, increase energy security, and create good-paying American jobs. BCSE is proud to support our members who will be involved with the H2Hubs, helping to boost the clean energy economy across America.”

###

The Business Council for Sustainable Energy (BCSE) is a coalition of companies and trade associations from the energy efficiency, natural gas, and renewable energy sectors, and also includes investor-owned utilities, public power, independent power producers, project developers, equipment manufacturers, and environmental and energy market service providers. Established in 1992, BCSE advocates for policies that expand the use of commercially-available clean energy technologies, products, and services.
