

The Business Council for Sustainable Energy (BCSE) is a coalition of companies and trade associations from the energy efficiency, natural gas, and renewable energy sectors.

BCSE advocates for policies at the state, national, and international levels that increase the use of commercially available clean energy technologies.

The vision that established BCSE in 1992 continues today, as BCSE's industries work together to meet U.S. energy needs in an affordable, safe, reliable, and sustainable manner.

## BCSE WORKS TO

- Enact policies that accelerate the deployment of energy efficiency, natural gas, and renewable energy.
- Implement cost-effective programs and policies that recognize the environmental attributes of energy sources and reduce greenhouse gas emissions.
- Increase the energy productivity of the economy and improve energy security.
- Encourage market-based initiatives for energy and environmental policies.

## SUSTAINABLE ENERGY IN AMERICA FACTBOOK

Clean energy continues its expansion in America—creating jobs and transforming the way Americans produce and consume energy. The *Sustainable Energy in America Factbook*, published by BCSE and BloombergNEF, chronicles this transformation and provides policymakers, journalists, and industry professionals with up-to-date, accurate market information on the U.S. energy landscape.
