BCSE Statement in Support of the PROVE IT Act

Washington, D.C. – Lisa Jacobson, President of the Business Council for Sustainable Energy (BCSE), offered the following statement in response to today’s introduction of the [Providing Reliable, Objective, Verifiable Emissions Intensity and Transparency \(PROVE IT\) Act](#) in the U.S. House of Representatives:

“BCSE believes that the publication of a U.S. Department of Energy carbon intensity study, and the other data collection required by the PROVE IT Act, will be an important tool to demonstrate that industries in the United States produce high quality products, with low carbon emissions.

“This bipartisan initiative will provide the data necessary to accelerate the deployment of U.S. clean energy technologies and solutions to global markets, boosting our nation’s energy security and economic growth. BCSE supports its enactment and applauds the efforts of Representatives John Curtis (R-UT-03) and Scott Peters (D-CA-50) to craft this thoughtful legislation.”

BCSE previously sent a [letter of support](#) to Senators Chris Coons (D-DE) and Kevin Cramer (R-ND) in response to [Senate advancement](#) of the PROVE IT Act in January 2024.

###

The Business Council for Sustainable Energy (BCSE) is a coalition of companies and trade associations that deploy clean energy and decarbonization solutions, with a sector focus on energy efficiency, natural gas, and renewable energy. Members include investor-owned utilities, public power, independent power producers, project developers, technology providers, environmental and energy market service companies, and more. Established in 1992, BCSE advocates for policies that advance the deployment of a broad portfolio of clean energy technologies.

For more information on BCSE, please visit bcse.org. For the latest industry data, download the [Sustainable Energy in America Factbook](#).
