

Investment & Finance for Clean Energy

A Call to Action in Cancún

Wednesday, 8 December 2010; 12:00—13:15
Westin Hotel (Boulevard Kukulcan KM 20)
Part of the IETA Suite of Side-Events

Overview

Both public and private finance are critical to the successful deployment of existing clean energy technologies. This panel will share insight and expertise into domestic and multi-lateral models for energy efficiency and renewable energy financing; the potential for leveraging public and private sector investments; the important role of private sector finance in addressing long-term climate change objectives; and what the private sector needs and can contribute to the UNFCCC process.
