

# AN OPEN LETTER TO CONGRESS

Lynn Miller and Josh Markle - Voith Hydro, Inc.

John Morrison - F.W. Behler, Inc.

Aurora Carrero - Energy Coordinating Agency

## **Now Is the Time to Pass a Strong Clean Energy and Climate Bill – For Our Economy and Our Environment**

As businesses and organizations that employ thousands of workers in clean energy industries, we urge Congress to enact strong clean energy and climate change legislation.

Comprehensive climate change and energy legislation with strong Energy Efficiency and Renewable Electricity Standards can create jobs, reduce consumers' energy costs and provide the basis for sustained economic growth.

- 1. Energy efficiency generates \$3 in economic benefits for each \$1 invested, producing jobs in every Congressional district in America.**
- 2. Renewable energy can bring a new manufacturing sector to the U.S. It will also reduce our dependence on fossil fuels and stabilize energy costs as we instead use renewable energy sources such as biomass, geothermal, sun, water and wind.**
- 3. Natural gas is an abundant and available clean burning resource, with over forty percent less carbon dioxide emissions than other conventional fossil fuels.**

Without a change in direction, our economy will continue to lose ground to other countries that are more aggressively investing in clean energy resources and technologies.

Strong clean energy policies can restore American leadership in job creation and innovation. We urge immediate adoption of strong federal energy and climate change legislation.
